

IMigrationMetadata

DbMigration

Website.Migrations.addQ1

```
graph BT; A[Website.Migrations.addQ1] --> B[IMigrationMetadata]; A --> C[DbMigration];
```

The diagram illustrates a generalization relationship. A box labeled 'Website.Migrations.addQ1' is positioned below two other boxes, 'IMigrationMetadata' and 'DbMigration'. Two arrows originate from the top of the 'Website.Migrations.addQ1' box and point upwards to the bottom of the 'IMigrationMetadata' and 'DbMigration' boxes, indicating that 'Website.Migrations.addQ1' is a specialized version of both interfaces.
